

Sydney Vapour Blasting

@ Paradise Garage

Vapour Blasting (also referred to as Hydro Blasting, Aqua Blasting, Water Blasting and Wet Blasting) offers a superior alternative to dry blasting, with a dust-free process and a softer surface finish. In cosmetic applications, this helps to keep components cleaner for longer.

Sydney Vapour Blasting uses genuine Vixen Wet Blasting machinery to harmoniously recondition **Automotive, Motorcycle, Marine, Aeronautical** and other industrial components to the highest standard. The process uses a water and abrasive slurry to simultaneously blast and degrease which prevents impregnation of media onto the component.

Vapour Blasting (or aqua/water/hydro/wet blasting) will **remove all applied surface coatings without damage to the parent material.**

No job is too small!

Ideal treatment to restore aluminium, cast iron and other metallic components to original standard.

Pricing from \$50 (plus GST). For smaller jobs, other pricing options are available.
